PROFILE

Mechatronics Engineering student with a strong interest in electrical systems, circuit design, and the integration of mechanical and electronic technologies. I bring solid analytical and problem-solving skills backed by hands-on experience in electronics, CAD design, and technical project development — aiming at automation, intelligent systems, and innovative

EDUCATION

Assiut University — Faculty of Engineering
B.Sc. in Mechatronics Engineering

2024 – 2029

CGPA 3.74 / 4.0 · Grade: Excellent

EXPERIENCE

- Focused coursework in electrical systems, circuit design, mechanics, and control engineering.
- Hands-on labs in electronics, CAD modeling, and technical project development.

ASME Asyut Student Section

Mechanical Design & Technical Member

2026 – Present

- Hands-on experience in mechanical design using SOLIDWORKS through practical modeling

PROJECTS

- Studied core engineering topics — gears, materials, and fasteners — and produced technical reports that strengthened analytical and documentation skills.

Fire Fighting Car

Role: Electrical Wiring & Connections

- Designed and executed the full electrical wiring and connection layout for a fire-fighting vehicle model.
- Ensured reliable power distribution and safe integration between motors, actuators, and control modules.
- Practiced circuit-level troubleshooting and disciplined cable-routing.

Bus Management System

Role: Automation & Workflow Developer

- Developed an automated bus-management workflow that streamlines routing and scheduling

SKILLS

- Reduced manual coordination overhead by automating repetitive operational steps.
- Explored workflow-automation tools (n8n) and data-flow design.
